Game Type: Board Game
Designer: James Ernest
Artist: N/A
Players: 3 to 7
Playing Time: 1 Hour
Components: Board, Cards, Rules
You Need: Pawns for every player, and one more pawn for Doctor Lucky

It's the original Cheapass Game, *Kill Doctor Lucky*. The story is simple: a crowd of bloodthirsty killers have gathered in Lucky Mansion, each with a good reason to murder the old man. And each of them is unaware that everyone else wants to kill him, too.

Kill Doctor Lucky is one of our greatest successes, still thriving today. You can now kill Doctor Lucky in the fully remastered *Anniversary Edition*, in the card game *Get Lucky*, and in the newest game in the series, *The Island of Doctor Lucky*.

You'll notice several differences between the original rules and the new editions. We think the new versions are better, but this PDF gives you a glimpse of where it all began.

This Print-and-Play version of *Kill Doctor Lucky* includes the original 1997 game board, the rulebook from the sixth printing in 2000 (which still used the same board), and the cards from the 2002 *Director's Cut*.

Printing Instructions:

The *Kill Doctor Lucky* 2019 Print and Play contains the following files:

- DrLuckyBoard: A full-size PDF of the game board.
 - You can print this on a large-format printer, or use Acrobat's tiling function to print it as several smaller pages.
- DrLuckyCardBacks: This is a single page of 16-up card backs.
 - These backs are not strictly necessary, but are included for completeness.
- DrLuckyCardFronts: This is a 6-page, 96-card file.
 - File includes a black bleed and crop marks.
 - Note: The corner letters on Room and Weapon cards do not seem to print correctly in newer versions of Adobe Acrobat. (The white letter on top has become transparent, so the drop shadow is what you see.) There's no known solution for this, but it's also not a huge problem. They just won't look like the original cards.
- DrLuckyCover: This is the artwork from the 1999 *Kill Doctor Lucky* envelope.
- DrLuckyRules: This is a single 8.5 x 11 double-sided page, designed to fold in half.
 - Note: The example cards in this booklet have the same corner number printing issue as the cards. Again, not a big deal, but it's in there.

In addition, you will need a pawn for every player, and one more pawn for Doctor Lucky.
